

Supplier Risk Review

The Phone Boss ULTD | Owner-led review | 09/13/2026

Scope	Zoho, Cloudflare, GitHub, Stripe, and two online repair-parts suppliers.
Method	Preliminary supplier risk review based on business use, data access, operational dependency and owner-provided control information.
Risk formula	Likelihood × Impact. Low: 1–4; Medium: 5–9; High: 10–16; Critical: 17–25.
Review limitation	The review does not independently certify supplier controls. Formal supplier evidence has not yet been consistently collected or documented.
Existing safeguards	MFA is enabled for all six supplier accounts. Zoho records have an independent backup or export. Stripe processes cards; the business does not store complete card numbers.
Decision	Enhanced review is required for Zoho, Cloudflare and Stripe. Standard review is appropriate for GitHub and the two parts suppliers.

Residual risk	Suppliers
Low	0
Medium	4
High	2
Critical	0

Priority conclusions	Recommended response
Zoho concentration	Document security/privacy review and test the independent export or backup restoration.
Cloudflare website dependency	Export DNS/configuration records and document recovery and incident-notification arrangements.
Stripe payment dependency	Retain PCI/service evidence and document fraud, dispute and account-recovery controls.
Parts supply resilience	Document warranty/return terms, quality checks and the ability to switch between the two suppliers.

Review tier	Suppliers
Enhanced	3
Standard	3

Scores are preliminary and should be updated when formal evidence is reviewed.																
Supplier ID	Supplier	Service	Information / dependency	Inherent likelihood	Inherent impact	Inherent score	Inherent risk	Existing controls	Residual likelihood	Residual impact	Residual score	Residual risk	Review rationale	Review tier	Evidence to obtain	Review status
SUP-01	Zoho	Business email, customer intake, repair records and receipts	Customer names, contact details, device/repair information, transaction records and operational history	3	5	15	High	MFA enabled; independent backup/export exists	2	5	10	High	High data sensitivity and operational concentration	Enhanced	Security and privacy documentation; service terms/DPA; MFA reference; backup/export and restoration test; incident notification and availability information	In progress
SUP-02	Cloudflare	Website hosting, DNS and domain services	Public website availability, DNS integrity, domain control and transfer of form submissions to Zoho	3	4	12	High	MFA enabled; public code can support website recovery	2	4	8	Medium	Website and domain compromise could disrupt customer access or redirect traffic	Enhanced	Account-security settings; DNS/configuration export; security/privacy documentation; incident notification; recovery procedure	In progress
SUP-03	GitHub	Public website and portfolio source-code hosting	Public code and deployment availability; no customer records intentionally stored	3	3	9	Medium	MFA enabled; repository intended to be public	2	3	6	Medium	Lower data sensitivity, but unauthorized changes or exposed secrets could affect websites	Standard	MFA reference; repository visibility review; secrets review; branch protection and account-recovery settings	In progress
SUP-04	Stripe	Active payment processing	Payment and transaction data; business does not store complete card numbers	3	5	15	High	MFA enabled; card processing outsourced to Stripe	2	5	10	High	Payment fraud, account takeover or outage could materially affect revenue and customers	Enhanced	Current PCI/service evidence; security/privacy terms; fraud and dispute controls; MFA/account recovery; incident notification	In progress
SUP-05	Parts Supplier 1	Online repair-parts supply	Business shipping and order information; replacement-part quality and delivery dependency; no customer repair information	3	3	9	Medium	MFA enabled; second supplier provides an alternative; no customer data shared	2	3	6	Medium	Primary risks are defective/counterfeit parts, delivery delay and warranty failure	Standard	Business identity; warranty/return terms; seller reputation; order history; part-quality checks; account-security settings	In progress
SUP-06	Parts Supplier 2	Online repair-parts supply	Business shipping and order information; replacement-part quality and delivery dependency; no customer repair information	3	3	9	Medium	MFA enabled; alternate supplier available; no customer data shared	2	3	6	Medium	Primary risks are defective/counterfeit parts, delivery delay and warranty failure	Standard	Business identity; warranty/return terms; seller reputation; order history; part-quality checks; account-security settings	In progress

Supplier Action Plan

Actions convert the preliminary review into repeatable supplier governance evidence.

Action ID	Supplier	Required action	Reason	Owner	Target date	Status	Closure evidence	Review frequency
ACT-01	Zoho	Document the security, privacy and service review.	Zoho handles the most sensitive and operationally important records.	Richard Vincent	09/27/26	Not started	Dated review checklist and approved decision	Annual
ACT-02	Zoho	Test restoration from the independent backup/export.	A backup reduces risk only when records can be restored.	Richard Vincent	10/04/26	Not started	Restoration-test record showing sample records recovered	Annual
ACT-03	Cloudflare	Export DNS and relevant configuration and document recovery steps.	Domain or DNS compromise could redirect or disrupt the website.	Richard Vincent	09/27/26	Not started	Protected configuration export and dated recovery procedure	After material change and annual
ACT-04	Stripe	Retain current PCI/service evidence and review fraud, dispute and recovery settings.	Stripe is a high-impact payment dependency.	Richard Vincent	10/04/26	Not started	Evidence references and completed review checklist	Annual
ACT-05	GitHub	Review repository visibility, secrets exposure, branch protection and recovery settings.	Public repositories can accidentally expose secrets or accept unauthorized changes.	Richard Vincent	09/27/26	Not started	Dated account and repository review record	Six-monthly
ACT-06	Parts Supplier 1	Document warranty, returns, seller reputation and part-quality checks.	Supplier risk is mainly product quality and delivery reliability.	Richard Vincent	10/11/26	Not started	Completed supplier checklist and sample quality record	Annual
ACT-07	Parts Supplier 2	Document warranty, returns, seller reputation and part-quality checks.	Supplier risk is mainly product quality and delivery reliability.	Richard Vincent	10/11/26	Not started	Completed supplier checklist and sample quality record	Annual
ACT-08	All suppliers	Create a supplier-review folder and annual review calendar.	Previous checks were not formally documented or consistently retained.	Richard Vincent	10/18/26	Not started	Folder structure, review calendar and completed evidence index	Annual and at onboarding
ACT-09	All suppliers	Back up the supplier-review and ISMS evidence repository.	The local evidence repository currently has no known backup.	Richard Vincent	10/18/26	Not started	Backup configuration and successful sample restoration record	Weekly backup; annual restore test
